The “Inside Scoop” on When the FDA Comes to Call

After your scoop of ice cream at Researchpalooza, stroll to the BSRB Kahn Auditorium for the “FDA Inside Scoop”!

Wednesday, August 27, 2014
BSRB Kahn Auditorium
2:00-3:00pm

Nancy A. Bellamy, FDA Investigator, Bioresearch Specialist, Detroit Office, has very kindly agreed to present the lecture she was unable to deliver in person at our FDA Research Symposium last October. She will discuss issues of importance for human subject protection, how to run an FDA-compliant clinical trial, and what “observations” of concern are most commonly found during FDA inspections. Her presentation will be followed by liberal time for questions and answers.

Don’t miss this opportunity to top off your Researchpalooza day with one last “scoop” of great information and insight!
