

PAAC Meeting Notes- 6/18/2014

Welcome & Announcements:

- The Forecasting Subcommittee created a new Forecasting template which was recently uploaded to the FINOPS website. This is located under Forms, Sponsored Programs, Forecasting Template by Project Grant
- A refresher demo on how to use the Forecasting template will be done in one of the upcoming PAAC meetings

eRAM Demonstration:

- What is eRAM?
 - eResearch Animal Management (eRAM) is a new Web-based system to manage animal research protocols, regulatory processes, and the ordering and tracking of animals used in research at the University of Michigan. It will replace eSirius
- Who will use eRAM?
 - Anyone who submits and edits applications and protocols, works with animals on a protocol, or reviews applications for approval or funding. In addition, anyone who acquires or transfers animals, or manages shortcodes will use the system
- eRAM website: <http://www.umich.edu/~eresinfo/am.html>
- See handouts for specific instructions on how to use the eRAM system
- Please contact MSIS (4-HELP) if you experience any problems with the new system

The meeting was cut short due to an electrical outage.
